Wake up to your favorite tunes
- Great sound quality thanks to the integrated sound box
- Play & charge your iPod / iPhone
- Wake up to the tunes from your iPod / iPhone

PHILIPS

sense and simplicity

Highlights

300 Lux light intensity

The senitivity to light differs a lot per person. In general, when using a higher light intensity a person needs less time to become fully awake. The light intensity of the Wake-up Light can be set up to 300 Lux. This makes sure you can wake up to the light intensity that suits your personal preference best.

4 natural wake-up sounds

At your set wake-up time, you will start hearing a natural sound or the selected radio station. It starts out quietly and takes a minute and a half to reach the volume level you selected. There are four sounds you can choose from: morning birds in the forest, a relaxing beep, the sounds of the African jungle or soft chimes in the wind. The gradually increasing sound will make the wake up process even more pleasant, ensuring you are never rudely woken up.

Dusk simulation

The gradual decreasing light and sound help you to drift to sleep. You can set your preferred time for the duration of the dusk simulation.

Energy saving lamp

Wake-up Light is the only dawn simulator that makes use of an energy saving lamp. It consumes up to 24% less energy compared to a Wake-up Light with a normal light bulb.

Great sound quality

The speaker in this Wake-up Light is backed up by an integrated sound box, assuring a great sound quality when listing to the FM radio or when waking up with the natural wake-up sounds.

Light wakes you gently

Light gradually increases in 30 minutes before your set wake up time. Light falls on your eyes and positively affects your energy hormones, preparing your body to wake up. This makes waking up a more pleasant feeling.

Play & charge your iPod/iPhone

Play your favorite music from your iPod / iPhone. Your iPod / iPhone will be charged when it is in the docking station, so you are always ready to use it when you are ready to go.

Wake up to the tunes

The iPod / iPhone docking station lets you wake up to your favorite songs. Just select your favorite song from from your iPod or iPhone and at your set wake-up time it will start to play, at first gently, gradually increasing over ninety seconds to the volume level you selected.

Specifications
